THE MESSAGE.

The message sent in by the president yesterday, the first day of the second | board bill, would make a good tax colsession of the Fifty-fourth congress, is lector in California. an excessively long and exhaustive document. In the main it is a statesmanlike document, remarkable alike our first page is a stunner, and no mis for what it recommends and for what it take. ignores. The sore-hearted west looked anxiously for some word of encouragement for the silent and discouraged glory of the fall so far. It is simply silver interests, but alas, no word es. delightful. caped the presidential lips which can be tortured into encouragement. So, so far as silver is con erned, we may as well take leave of it until there is a complete change in the executive STATE OF OHIO, CITY OT TOLEDO, 88 policy of the nation. The foreign policy outlined by the president is vigorous, comprehensive and manly It covers all the leading policies likely to interest the country and which are familiar to the people. The president speaks of the production of the "precpolicy outlined by the president is cious metals." This seems a melan-choly jibe at silver, reduced by the policy of the government to the posi-tion of a base and dishonored metal leaving gold alone as the one metal worthy to be called "precious." The army is dwelt upon at length. The main teatures of the message under this head is that the and acts directly on the blood and mucous surfaces of the system. There is no feature of the message more commendable than this. It is all important that the military spirit of the people be encouraged and fostered in October 31, 1894. couragement of the organization of the every way. We are glad that this matter has at last attracted the presidential notice. There is a little pardonable glorification over the condition of our 1894. navy. Indeed the government has much to justify the glorification of the president under this head. We have now the foundations laid upon a permanent basis for a first-class naval establishment. The government has certainly no more important interest to care for than this.
